Exampleapp/notes POST

Browser → **Server**: HTTP POST https://studies.cs.helsinki.fi/exampleapp/new_notes

{content: "", date: "2021-08-16T12:32:10.636Z"} --->

Note (Browser): Browser sends payload to server from form submit request

Server ⇠ **Browser**: new HTTP GET Request

Note (Server): Server adds payload to notes list and instructs the browser to do a new HTTP GET request from the address in the response headers' location property

Browser → **Server**: HTTP GET https://studies.cs.helsinki.fi/exampleapp/notes

Note: Reloading of this url is detailed extensively in the course reading material, specifically this section:
https://fullstackopen.com/en/part0/fundamentals_of_web_apps#loading-a-page-containing-java-script-review
To avoid repeating the diagram I have elected to omit and provide details as per above.
